

Forklift Electrical Part

Electrical Part for Forklifts - Forklifts along with other lift trucks can have specific labels used in some hazardous locations. The label indicates that this particular model of lift truck meets the minimum standards of ANSI/UL 553 for electric forklifts or ANSI/UL 558 for internal combustion engine lift trucks.

The application for labels intended for lift trucks could be found in National Fire Protection Association NFPA 505 - Powered Industrial forklifts including: Type Designations, Areas of Use, and Maintenance and Operation. Consult your local insurance carrier and Fire Marshall for more information about the approved uses of industrial powered forklifts in your application.

If the certain forklift satisfies the outlined standards, labels may be attached. A labeled forklift would show the type of designation put on the nameplate and will have a correctly corresponding label placed.
